

## Offer a billing and recurring payment platform to your clients

With help of bil software, your clients can start billing their clients. They can build recurring payment plans, add manual payments and automatically send invoices with the selected payment options to clients.

### Recurring invoices

Generate and send automatic invoices to your clients by email, text or regular mail

### Dynamic billing

Add dynamic billing records, record payments and issue invoices at the end of selected period

### Active payments

Let your clients pay invoices as they like. Use payment gateways, credit cards or points

### Smart reminders

Send smart and attractive reminders to your clients about upcoming and delayed payments

### Clients portal

Let your clients access their data and invoices from your own dedicated system under your domain

### Billing API

Integrate your system with a billing API. Use it for billing and pro- visioning purposes
