

Offer a booking system to your clients

With help of online booking software, you can offer your clients a system where their clients can book a visit, appointment, repair, haircut or whatever else is necessary. Your clients will be able to build a dedicated booking website or add a booking widget to their existing one. You can also offer a very advance mobile app where they can receive and control the booking process, everything under your brand.

Page builder

Your clients will be able to build their own booking websites under their logo, name and domain

Mobile apps

Your clients will be able to use apps that allow them or their employees to receive and process bookings. They can also use the app to add or remove reservations

Calendars

With the ability to create calendars, your clients can sell reservations-/time from multiple slots. Selling lessons, doctor's appointments and tire changes is easy

Performance

Your clients can build a time selling system where employees are paid for actual work. Build a revenue sharing model for teachers, doctors, consultants and more

Reminders

The system can help remind customers and employees about appointments through emails, text messages and push notifications if the mobile app is in use

Widget

Your clients will be able to add ordering widget if they already have a website
