

Client Management System

White-label licensing model

Offer a sales and accounts management system to your clients

With help of ocl software, you can offer your client a place where they can save information about potential and existing clients. They can use it for processing sales or keeping an eye on existing contracts. The system is equipped with almost 100 different modules to help businesses grow

Like Excel

The system was designed to be a next step after using Excel. Your clients simply build a list and attach to the information they need

Sharing

Your clients easily share the information with your partners and employees. They can easily build a list together. The invitation system is at your client's command

Controlling

The system helps clients to avoid missing important events. Your client can set the dates on tasks, assets, contracts, calendars and the system reminds them when the time comes

Sales automation

If your client needs a system that will automatically create an invoice, send reminders to customers or push employees, this system can help

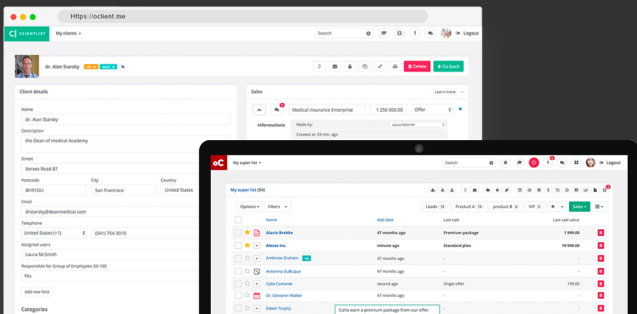

Simple marketing

Built-in marketing systems allows your clients to send marketing information through email or text messages to client groups.

Integrations

Allow your client to integrate the system with their existing software. Import data from Excel, add Google Calendar and more.
