

## Offer your client a system for email marketing

With help of oml, your clients can upload their emails and build smart email marketing campaigns. The system allows for building smart campaigns with use of an email-bot to turn cold leads into warm leads. Your client attaches their current mailboxes to the system to build trust.

### Client mailboxes

Your clients can attach their own email mailboxes. This way they can build trust in the eyes of the email recipients

### Cold mailing

Add email lists to the platform and discover who is interested in your products or services

### E-mail bot

Use an email bot to automate your email communication with clients. Reply with automatic intelligent answers to clients' questions and forward them!

### Automation

Add leads to the system and let it make the lead warmer for you. Use the API to integrate it with any sales solution on the market

### Fly by wire

The system will automatically build conversations with email recipients. When it's necessary, it will redirect it to a real person

### TEXT (SMS)

The system can also work with text messages. When a sale opportunity is discovered, the system can send a text to real people for a fast reaction
