

Video chat system

White-label licensing model

Offer a video chat system to your clients

With help of vli, your clients can build their video chatrooms where they can talk to others. The system is fully private thanks to peer-to-peer technology. Your clients can build simple one-to-one rooms, conference rooms for up to 10 people or create webinars.

Video link

Your clients can build rooms that will be available through a unique link that can be sent to other parties

One-to-one

Your clients can build encrypted one-to-one rooms with password protection

Video conference

Your clients can build peer-to-peer video conference rooms for up to 12 people.

Webinars

Your clients can build webinar video rooms where they can present to up to 100 people

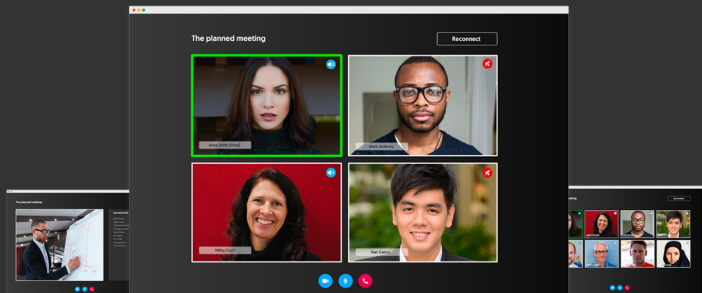

Recording

The system will allow for recording the session if the host party wishes to

Virtual white board

The system is equipped with a virtual white board where host can present or draw something on the screen
